## **ERISA Timely Payment Regulation**

#### **The Problem**

Physicians and hospitals frequently list insurance carriers' failure to pay promptly as one of the most troublesome aspects in healthcare. One of the main causes often cited in claim processing delays are ERISA plans which frequently tell providers bluntly, "We don't have to pay according to State Prompt Payment Laws."

The Department of Labor recently updated ERISA's requirements for benefit claims processing to address what they say are recent, dramatic changes in the delivery and financing of health care services. The DOL expects the tougher new regulations to improve health care quality by averting harmful, inappropriate delays and denials of health benefits. It will also increase confidence in the employment-based health benefits system and help streamline and make more uniform and predictable claims and appeals procedures. The DOL expects that the economic benefits of the regulation will be large. Benefits are expected to be large in part because serious weaknesses in current claims determination processes, which the regulation will help correct, are widespread. Elements of health claims and appeals processes that are widely considered to be essential are often lacking, the U.S. General Accounting Office has reported. Just 41 percent of HMOs and 50 percent of indemnity insurers studied by GAO provided for appeals decisions to be made by individuals not involved in the original denial. Written denial notices explaining appeal rights were provided by 97 percent of HMOs, but just 67 percent of indemnity insurers. Expedited reviews were provided by 94 percent of HMOs, but just 67 percent of indemnity insurers.

#### **The Solution**

Use the sample appeal letter below to put ERISA claims processors on notice that lengthy claim reviews are no longer legal. The original law provided for a decision within 90 days. New ERISA regulations have cut the time for prompt payment or denial to 30 days, with a 15 day extension available if the claimant was promptly notified.
